**1<sup>st</sup> BDS (2018 - 19 batch)**

**2nd Internal Assessment Examination**

**Date: 20.02.19**

**Time: 09.15 AM to 1**

**Answer all questions**

**Max. Marks: 35**

**Illustrate your answers with suitable diagrams**

**1. Describe the Orbit under following headings:**

**2 + 3 + 3 =**

**a. Boundaries & Contents**

**0**

**b. Name the Extra ocular Muscles with attachments & Nerve Supply**

**c. Actions of Extra ocular Muscle & Applied Anatomy**

**d. Ciliary ganglion**

**4 x 4 =**

**Write short notes on:**

**1. Tentorium Cerebelli**

**2. Microscopic Structure of Tongue**

**3. Derivatives of 1<sup>st</sup> Pharyngeal arch**

**4. Blood Supply of Thyroid gland**

**5 x 2 =**

**5. Parts of Pituitary gland**

**6. Nerve Supply of Parotid gland**

**7. Chorionic villi**

**8. Two tributaries of Cavernous Sinus**

**9. Name the parts of Vertebral artery**

Max.Marks:35

Part B-Biochemistry  
1<sup>st</sup> BDS(2018-19) Batch Students 2<sup>nd</sup> Internal Assessment Theory Examination

Answer all questions

- ✓1.Give an account of sources,recommended daily allowance, biochemical functions, deficiency manifestations vitamin -D.  
(1+1+4+3=9 Marks)

4x4=16 Marks

Write short notes on

- 2.Significance of HMP Pathway  
3.Synthesis of ketone bodies  
4.Steps of Urea cycle  
5.Gout

2x5=10 Marks

Write brief notes on

- 6.Functions of HDL -  
7.Genetic Code  
8.Renal glycosuria -  
9.Scurvy  
10.Purine salvage pathway

Drs Sudha and Nageswara Rao Siddhartha Institute of Dental Sciences  
Department of Dental Anatomy and Oral Histology  
First BDS - Second Internal Assessment -22/2/19.

Duration: 1 1/2 hrs

Max Marks :35

### INSTRUCTIONS

- Answer all questions
- Draw diagrams where necessary

#### Essay:

1. Define periodontium, write in detail about fibers & functions of PDL (9)

#### Write short notes on

2. Occlusal aspect of maxillary first premolar
3. Hypocalcified structures of dentin
4. Age changes of dentin
5. Differences between cellular and acellular cementum

(4 x 4=16)

#### Write Briefly on:

6. Zones of pulp
7. Tomes granular layer
8. Pulpstones
9. Diff. between maxillary & mandibular canine
10. C E J

Time: 9.15am to 10.45am

Marks: 35

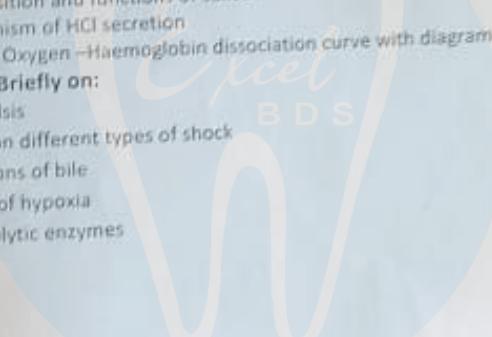

1. Enumerate respiratory centres with their location. Explain neural regulation of respiration with the help of neat labelled diagrams. Add a note on Hering-Breuer reflex.  $3+4+2=9$   
**Write Short Notes on:**  $4 \times 4 = 16$

2. Short Term Regulation of Blood Pressure  
3. Composition and functions of saliva  
4. Mechanism of HCl secretion  
5. Explain Oxygen-Haemoglobin dissociation curve with diagram

$5 \times 2 = 10$

**Write Briefly on:**

6. Peristalsis  
7. Mention different types of shock  
8. Functions of bile  
9. Types of hypoxia  
10. Proteolytic enzymes

DENTAL ANATOMY & ORAL HISTOLOGY

Your answers should be specific to the questions asked.  
Draw neat labeled diagrams wherever necessary.

2 X 10

**LONG ESSAY**

1. Describe in detail the life cycle of Ameloblasts
2. Define periodontal ligament. Discuss the principal cells of periodontal ligament

6 X 5

**SHORT ESSAY**

3. Physical & Chemical properties of Dentin.
4. Classify Cementum and describe each type in brief.
5. Incremental lines.
6. Enumerate and describe in brief the theories of pain transmission through dentin.
7. Explain with Diagram the different histologic zones dental pulp.

**SHORT ANSWERS ( Answer any Ten Questions )**

2x10=20

8. Tomes Processes and Tomes Granules.
9. Defense cells of pulp.
10. Contents of dentinal tubules.
11. Interglobular dentin and interglobular spaces.
12. Anatomic repair and Functional repair.
13. Hunter Scherger Bands.
14. Ground substances.
15. Functions of Periodontal ligaments.
16. Pulp stones.
17. Epithelial rests of Malassez.
18. Toluidine Blue.

# MALLA REDDY INSTITUTE OF MEDICAL SCIENCES

Suraram, Jeedimetla, Hyderabad

Subject: Anatomy

Course: 1<sup>st</sup> BDS

Exam: 2<sup>nd</sup> Internal Assessment Examination

Marks: 70

Time: 10.00 am to 1.00 pm

Date: 11.03.2019

Answer all Questions.

Draw Well Labelled Diagrams where ever necessary.

## Essay Questions: -

1. Describe thyroid gland under the following headings  $(2 \times 9 = 18 M)$ 
  - a) Gross Anatomy
  - b) Blood Supply
  - c) Applied importance
2. Describe Temporo mandibular joint under the following headings  $[2 + 3 + 3 + 1 = 9 M]$ 
  - a) Type of joint
  - b) Structure & relations
  - c) Movements & muscles producing it
  - d) Applied Importance

$(2 \times 9 = 18 M)$

$[4 + 3 + 2 = 9 M]$

## Short Essays: -

3. Histology of submandibular gland  $(8 \times 4 = 32 M)$
4. Extra cranial course of facial nerve
5. Ophthalmic artery
6. Naso pharynx
7. Histology of fundus of stomach
8. Secretomotor supply of parotid gland
9. Maxillary nerve course and branches
10. Structures passing between constrictor muscles

## Write Briefly: -

11. Superficial temporal artery
12. Jugular foramina
13. Retro mandibular vein
14. Parts of hyoid bone
15. Histology of medium sized artery
16. Stylo mandibular ligament
17. Pterion
18. Stylo pharyngeus muscle
19. Parts of cervical vertebra
20. Name the extra ocular muscles

$(10 \times 2 = 20 M)$

Maxillary artery  
Anterior cerebral  
Internal carotid  
Stylo mandibular  
Sphenopalpebral

DEPARTMENT OF DENTAL ANATOMY & ORAL HISTOLOGY

I-B.D.S (2019 JULY)

II<sup>nd</sup> INTERNAL EXAMINATION.

Answer to the point only.

Draw neat & labelled diagrams wherever necessary.

Duration: 3 hours

Max Marks: 70

Essays:

9 X 2 = 18 marks

- ✓ Discuss the anatomy of Maxillary first premolar tooth. Add a note on arch traits of maxillary premolars,
- ✓ Discuss in detail about Development, Classification, Morphology & Histology of Salivary glands.

Write Short Notes on the following:

4 X 8 = 32 marks

3. Differences b/w Cellular & Acellular cementum.
4. Bone remodelling
5. Principal fibers of periodontal ligament
6. Write about occlusal anatomy of Mandibular 2<sup>nd</sup> premolar
7. Cementogenesis
8. Write about cells of periodontal ligament
9. Describe the functions of saliva
10. Write about enamel rods, red sheath & Inter rod substances.

Answer in two or three sentences.

2X 10 = 20 marks

11. Mylohyoid ridge
12. Bundle bone & Sharpey's fibers *half*
13. Sequence of eruption of primary & permanent teeth
14. Physical properties of enamel
15. Cingulum & Cusp
16. Cementoenamel junction
17. Anatomical crown vs Clinical crown
18. Embrasures & Contact points
19. Incremental lines of Salter
20. Anatomical repair vs Functional repair of cementum

**FIRST YEAR BDS REGULAR STUDENTS**

Time: 3 Hours

Date: 26.02.2019

Max. Marks: 70

**Note:** Write Part-A and Part-B separately. Answer All Questions. Draw diagrams  
Where ever required.

**PART-A- PHYSIOLOGY – 35 MARKS**

**LONG ESSAY**

(3+6=9)

1. Define Blood pressure. Describe briefly regulation of Blood pressure.

$4 \times 4 = 16$

**WRITE SHORT ANSWER:**

2. Vital capacity  
3. Hypoxia  
4. Micturition reflexes  
5. Functions of Saliva

**WRITE BRIEFLY ON:**

$5 \times 2 = 10$

6. SA Node  
7. Heart sounds  
8. Respiratory centre  
9. Threshold substances  
10. Functions of Glomerulus.

**PART-B- BIO-CHEMISTRY – 35 MARKS**

**LONG ESSAY**

(1+5+2+1=9)

11. What is Urea. Describe the urea cycle and mention its inborn errors.  
Normal level of Blood urea.

B D S

**WRITE SHORT ANSWER:**

$4 \times 4 = 16$

12. Absorption, Transport and storage of iron.  
13. Isoenzymes, give two examples and mention their clinical significance  
14. Jaundice  
15. Synthesis of thyroid hormone.

**WRITE BRIEFLY ON:**

$5 \times 2 = 10$

16. Transmethylation and give two examples  
17. Substrate level phosphorylation  
18. Biological functions of vitamin-C  
19. Mention the conditions arising due to the deficiency and excess  
of fluoride in the body.  
20. What is the normal blood calcium level. How it is regulated.

// BEST OF LUCK //

PART-A: PHYSIOLOGY

Date: 23.02.2019

Max.Marks: 35

- ✓ 1) Define arterial blood pressure. Mention factors determining it. Add a note on short term regulation of arterial blood pressure.

(2+4+3) 9 Marks

Write short note on:

(4x4) 16 Marks

- 2) Control of salivary secretion.

3) Neural regulation of respiration.

- 4) Cardiac cycle.

5) Hypoxia.

Draw & Label:

(5x2) 10 Marks

- 6) Oxy-Hb dissociation curve.

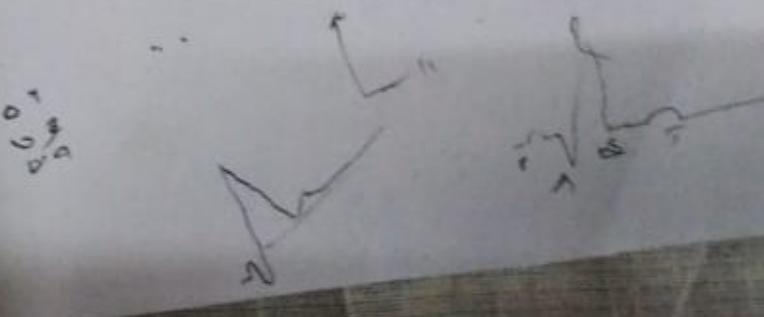

7) Enterohepatic circulation.

- 8) ECG in lead II.

9) Lung volumes & capacities.

- 10) HCl secretion in parietal cell.

R IC<sup>+</sup> CAPACITATION  
IC<sup>-</sup> SENSITIVITY

**II INTERNAL ASSESSMENT BDS 2018-19 BATCH 21.2.2019**

Answer all questions. Draw neat, labelled and coloured diagrams for every answer.

M.S. MORAIS

MARKS - 40  
TIME - 2½ hrs.

$$2 \times 9 = 18$$

$$2+2+2+2+1$$

$$1+2+2+3+1$$

$$4 \times 3 = 12$$

**ESSAY QUESTIONS**

1. Describe origin, course, relations, branches and applied anatomy of Mandibular nerve
2. Describe the type of joint, ligaments, relations, movements & muscles causing movements, applied anatomy of Temporo-mandibular joint.

Write briefly on following

3. Histology of tongue
4. Development of palate and its anomalies
5. Lateral wall of nose
6. Relations of Hyoglossus muscle

Write very short notes

7. Name cartilages of larynx
8. Branches of maxillary artery
9. Bell's palsy
10. Lateral pterygoid muscle
11. Styloid apparatus

$$5 \times 2 = 10m$$

BDS II INTERNAL THEORY EXAMINATION  
DEPARTMENT OF BIOCHEMISTRY

Date: 23-02-2019

Time 1 ½ Hours

Max Marks 35

ANSWER ALL QUESTIONS

Essay question 9 Marks

11. Write about glycolysis and citric acid cycle. How TCA cycle is the common metabolic pathway for oxidation of food stuffs.

Write short notes on 4x4 = 16 Marks

12. Write about transmethylation and what are the important methylated products and their role in the body.

13. Write about the metabolism of ketone bodies.

14. Write about various metabolites synthesized from Tyrosine, mention the disorders of Tyrosine metabolism.

15. Mention the structure of hemoglobin and how does hemoglobin transport oxygen and carbondioxide.

Write brief notes on 5x2 = 10 Marks

16. Creatinine

17. Sickle cell anemia

18. Gout

19. Formation of deoxyribonucleotides from ribonucleotides

20. Lipoproteins

Answer all questions

Draw neat labeled diagrams wherever necessary

1) Describe the Origin, Course, Relations, Branches and Applied Anatomy of Mandibular nerve 9

2) Describe the Lateral wall of Nasal cavity under the headings –  
a) Formation b) Features c) Blood supply and d) Nerve supply

**Write a short notes on**

8X4=3

- 3) Muscles of Soft palate
- 4) Submandibular ganglion
- 5) Development of Palate
- 6) Relations of Lateral lobe of Thyroid gland
- 7) Nasopharynx
- 8) Derivatives of Hyoid arch
- 9) Internal jugular vein
- 10) Microscopic structure of Liver

10X2=20

**Write Briefly on**

- 11) Features of Axis vertebra
- 12) Jugular foramen – structures passing
- 13) Little's area
- 14) Mention the branches of Subclavian artery
- 15) Styloid apparatus
- 16) Temporalis muscle
- 17) Diagram of microscopic structure of Trachea
- 18) Inferior alveolar artery
- 19) Infraorbital nerve
- 20) Circumvallate papillae
